

# Annual Report

GOALPrime Organisation Nigeria

**A Better Humanity  
Is Possible!**

GOALprime protection team, have supported 40 (10 Males, 30 females) identified children at risk in Konduga and Monguno LGAs through comprehensive individual case management activities. These cases were identified based on vulnerability assessments conducted by trained caseworkers, who thoroughly evaluated the specific needs of each child.

# Highlights

**Early Identification of malnourished children saves lives!** Identify malnourished children and ensure timely intervention. Maternal health is crucial for positive birth outcomes. Monitor MUAC values to detect and address acute malnutrition early.

In 2024, GPON extended its reach with representation offices in Zamfara and Sokoto, fostering ongoing dialogues with decision-makers and partners in the north-west region. Our country head office, situated in Abuja, plays a pivotal role in actively participating in Nigerian public discussions. We engage in a comprehensive range of information, advocacy, and fundraising initiatives directed at decision-makers, civil society, and the public at large.

At the end of 2024, 146 people worked for or with GPON to deliver humanitarian assistance. Of these, 61, were employees with technical capacity and expertise, and approximately 85 were Adhoc, community volunteers, daily or other types of workers. In the Technical Professional category, 55% of the entire Technical Professional staff—worked in hard-to-reach locations.

# GPON's Mission and Structural Framework

GOALPrime Organization Nigeria (GPON) is a National Social Enterprise Non-Government Organization with a vision to realize a better world for children, young people, and caregivers. GOALPrime is committed to achieving its vision via partnering with all stakeholders to realizing a world where children, young people and caregivers are safe, supported protected, and empowered through age appropriate, culturally sensitive, disability inclusive and gender transformative approaches.

GOALPrime Organization Nigeria presently implements in the BAY States (Borno Adamawa and Yobe) of the Northeast of Nigeria and the Federal Capital Territory where we have reached over 7,000,000 lives (directly and indirectly) with integrated services across different thematic areas of response vis-à-vis child protection in emergencies, education in emergencies, nutrition in emergencies, primary health, WASH in emergencies, GBV in emergencies, life-skills, peacebuilding, Implementation research, common pipeline management and socio-economic reintegration for children affected by armed conflict.

GOALPrime's programmes cut across Emergencies, Nexus, and Development. GPON is committed to the humanitarian principles of humanity, neutrality, independence and impartiality. GPON is registered as a foundation under Nigerian law.

In 2024, GPON effectively responded to both immediate and prolonged crises spanning over 15 Local Government Areas (LGAs) in Borno, Adamawa,

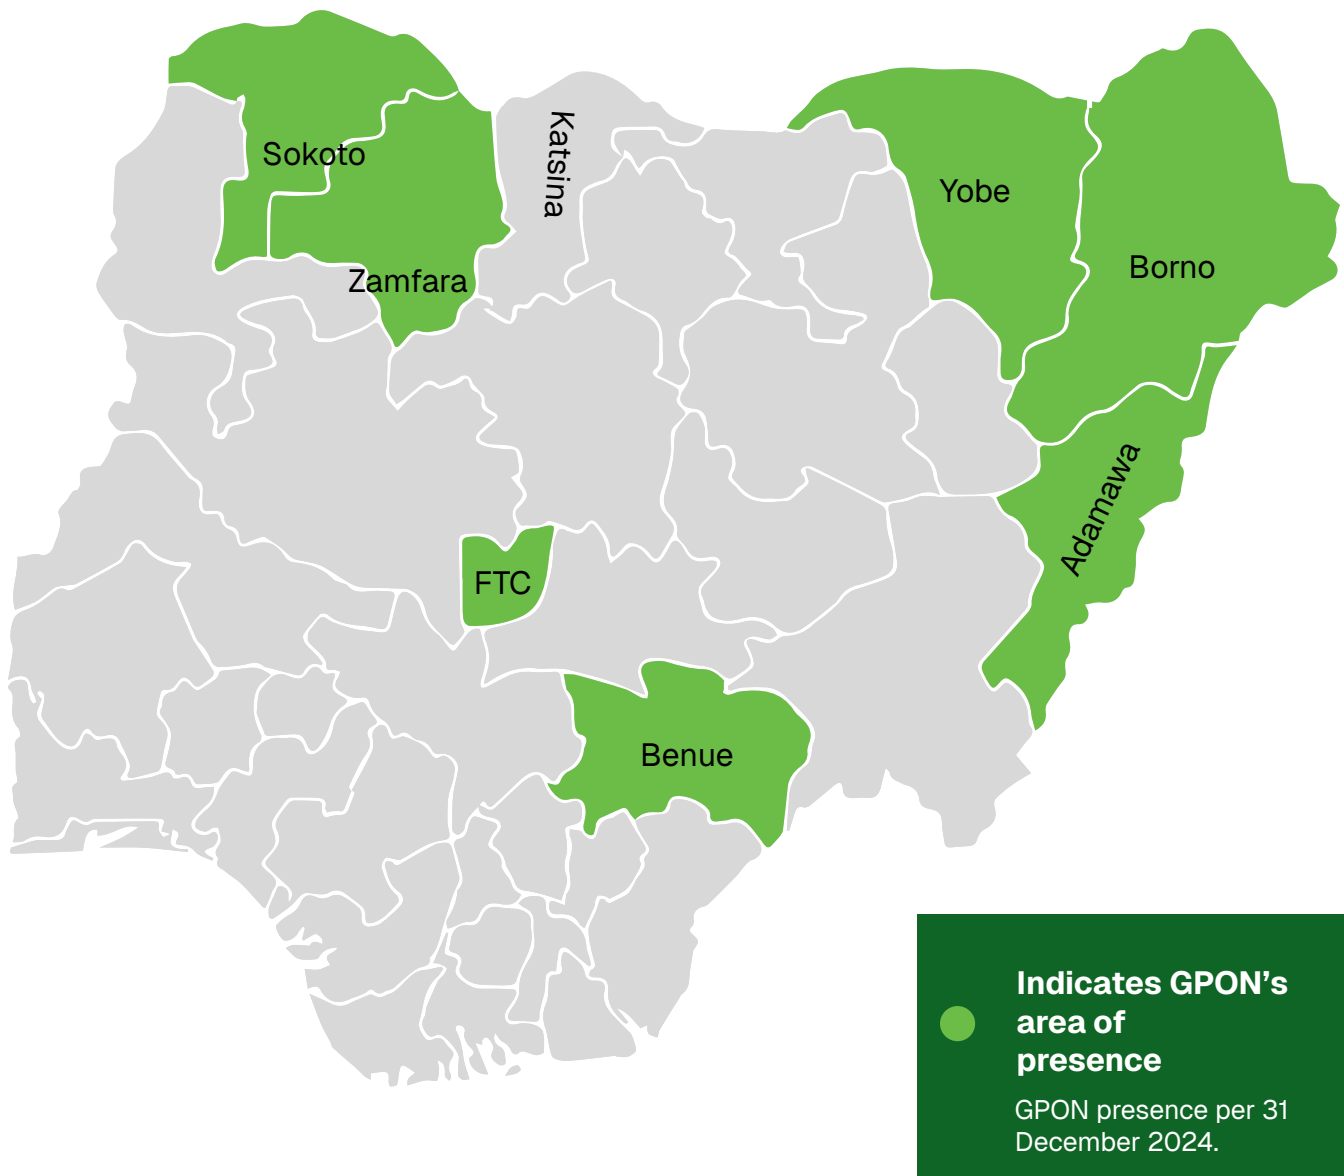

and Yobe (BAY) states, as well as Zamfara, Sokoto, and the Nigeria Federal Capital Territory (FCT). Our primary focus involved the provision of humanitarian aid through program activities in the field. GPON specializes in eight core competencies, including water, sanitation, and hygiene promotion (WASH), education, life skills, protection from violence, nutrition and health, peacebuilding, implementation research, common pipeline management, and socio-economic reintegration for children affected by armed conflict.

We actively advocate for the rights of displaced and vulnerable individuals, engaging decision-makers at local, national, regional, and global levels. Our advocacy efforts draw upon firsthand experience and specialized expertise. GPON's Country Operations are overseen by the Country Director at the Abuja headquarters in Nigeria, while program coordination takes place at the Maiduguri field office under the Director of Programmes.

In 2024, GPON extended its reach with representation offices in Zamfara and Sokoto, fostering ongoing dialogues with decision-makers and partners in the north-west region. Our country head office, situated in Abuja, plays a pivotal role in actively participating in Nigerian public discussions. We engage in a comprehensive range of information, advocacy, and fundraising initiatives directed at decision-makers, civil society, and the public at large.

# Acknowledgement to Partners

We express our sincere gratitude to our esteemed donors and partners worldwide for their unwavering support. Your invaluable contributions stand as a guiding light, inspiring and propelling our tireless endeavors to effect positive transformation in the lives of those we are committed to serving.

The trust you place in our vision serves as a catalyst, enabling us to persist in our mission with unwavering passion and dedication. The collective generosity of donors like you serves as the cornerstone of our ability to translate vision into impactful action on the

ground, reaching and uplifting vulnerable individuals and communities.

We extend our deepest appreciation to each one of you, recognizing your indispensable role in our journey. Your partnership is fundamental to our shared pursuit of making a tangible difference in the world.

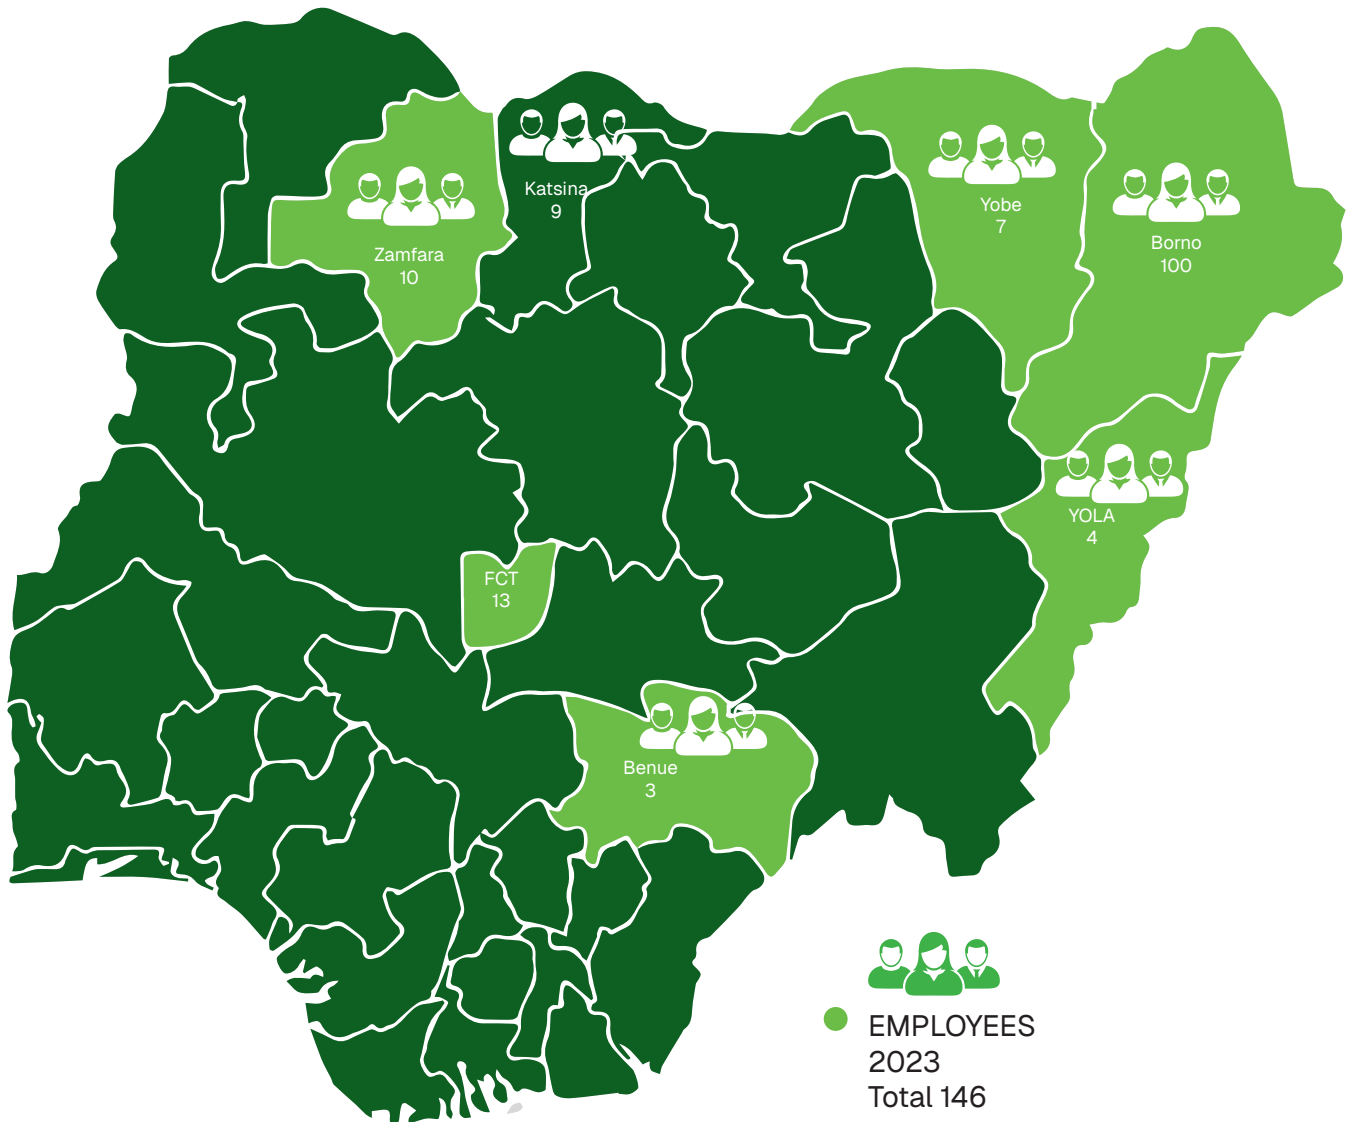

Thank you for being integral to our mission.

Embracing the Belief: A Better Humanity is Not Only Imaginable but Achievable!

## GPON Presence States in Nigeria

At the end of 2024, 146 people worked for or with GPON to deliver humanitarian assistance. Of these, 61, were employees with technical capacity and expertise, and approximately 85 were Adhoc, community volunteers, daily or other types of workers. In the Technical Professional category, 55% of the entire Technical Professional staff—worked in hard-to-reach locations.

# Message from the Country Director

“Our approach centers around the people we serve—not just as recipients of aid, but as active participants in designing and shaping our programs. Throughout this report, you’ll see how community feedback, success stories, and human-interest stories played a key role in helping us improve and adapt our interventions.”

”

It gives me great pleasure to share with you our Annual Report for the year 2024. This report captures both the incredible progress we’ve made and the many challenges we’ve faced over the past year. At GOALPrime Organization Nigeria (GPON), our passion for creating a safer and healthier world for children and their caregivers has remained strong, even as humanitarian needs have continued to grow and become more complex.

Despite these challenges, we stayed focused on our mission—a better world, expanding the reach of our programs, and engaging in critical policy discussions at the local, state, and national levels. GPON has continued to be a lifeline for people in extremely vulnerable conditions, offering both immediate relief and long-term support.

The year 2024 brought with it many trials for the communities we serve. Conflict, displacement, poverty, and the worsening effects of climate change all contributed to increased hardship. Yet, these difficult times also highlighted just how essential our work is—and how important it is to keep adapting and innovating in the way we respond.

At GPON, innovation is part of who we are. We remain committed to standing with people whose lives have been disrupted by crises, and we continue to look

for better ways to bring hope and support. In this report, you’ll see some of the ways we’ve made a difference—impacting thousands of lives across the BAY states and beyond.

With the support of our partners, donors, and dedicated team members, we were able to reach over one million people in 2024. Their stories of strength and resilience keep us inspired and grounded. We understand that while political conversations may come and go, our responsibility is to remain present and committed to those who need us the most.

I am deeply proud of the GPON team—our staff and volunteers—who responded to every challenge with dedication, skill, and compassion. And to our partners and donors, thank you for standing with us. Your support continues to make all the difference.

Together, we will keep striving for a world where dignity, safety, and hope are within reach for everyone.

**Prof. Christopher Chinedumuije Oguegbu**  
(PhD, FBU, PMP, MDM, FCE, PFD, FCIML, Dr.IR)  
Professor-Disaster Management and Humanitarian Studies  
Country Director, GOALPrime Organization Nigeria.

## Message from the Board Chairperson

D

ear Partners, Stakeholders, and Friends,

It is with great pride and gratitude that I present this year's Annual Report, which captures not only our collective achievements but also the resilience, commitment, and shared vision that continue to drive our organization forward.

This year, we navigated complex challenges while remaining steadfast in our mission to create lasting impact in the communities we serve. Our programs, partnerships, and advocacy efforts have not only grown in scale but have deepened in relevance—responding directly to the evolving needs of the people at the heart of our work.

I am especially proud of the dedication

shown by our leadership, staff, and field teams who have gone above and beyond, often under difficult circumstances. To our donors, partners, and community stakeholders, your unwavering support and collaboration have been instrumental to every success we celebrate today.

As we look to the future, the Board remains committed to strong governance, transparency, and innovation. Together, we will continue to strengthen our systems, scale our impact, and remain true to our values of inclusion, dignity, and justice for all.

Thank you for walking this journey with us.

Warm regards,  
**Ms Onwunali Oluchukwu Favour**  
Chairperson, Board of Directors

# GPON People

## Recruitment and Retention

In the 2024 financial year, we successfully filled 18 positions across various departments. These roles attracted more than 2,000 applications, with women accounting for over 54% of applicants—a testament to our inclusive recruitment approach. Our staff retention rate stood at a solid 87%, reflecting our efforts to maintain a stable and engaged workforce.

## Looking Ahead

In 2025, we will continue to strengthen a culture of accountability, learning, and trust. Our goal is to attract, develop, and retain diverse talent, while building a workplace where people feel valued, motivated, and equipped to reach their full potential. We remain dedicated to building an organization where positive work practices are the norm and where every team member can contribute meaningfully to our shared mission.

## Creating a Positive Workplace

In line with our strategic goals, GPON continued to prioritize the growth and well-being of our people throughout 2024. We recognize that a strong and supportive work environment is key to delivering our mission. Our team remains at the heart of everything we do, and we are committed to fostering a workplace culture rooted in our values—one that empowers staff to thrive and succeed. Throughout the year, we actively worked to create a positive, inclusive, and safe environment that supports collaboration, trust, and high performance.

## Learning and Development

We continued to invest in staff capacity building through a mix of virtual learning and in-person training. Training sessions in 2024 covered key areas such as:

- Safeguarding and Protection from Sexual Exploitation, Abuse, and Harassment (PSEAH)
- Security and Safety Awareness
- Language and Communication Skills
- Project and HR Management
- Digital Tools and Systems
- Budgeting and Financial Oversight

All staff participated in a mandatory Counter Fraud training in March 2024, alongside refresher sessions on our updated Safeguarding and PSEA policies. Additionally, we reviewed and strengthened our internal vetting procedures and reinforced our commitment to a zero-tolerance stance on sexual harassment and abuse.

## Child Protection Impact

In 2024, GPON delivered holistic child protection services to a total of **15,376 individuals (Men: 2,576; Women: 4,372; Boys: 1,869; Girls: 4,500)** across Monguno, Ngala, and Konduga in Borno State, Nigeria. Our efforts focused on reducing risks of violence, neglect, and exploitation by strengthening case management systems, promoting positive parenting, and ensuring access to essential services such as healthcare, education, and psychosocial support. Special attention was given to vulnerable children, including those separated from families or living with disabilities.

These initiatives, made possible through partner support, contributed to safer, more resilient communities and lasting improvements in child well-being.

# Door-to-Door Outreach

The protection team, working through community-based facilitators and case workers, reached 10,374 people (2,496 men, 3,790 women, 1,869 boys, and 2,219 girls) with key messages during a mass and routine awareness campaign.

These messages were based on insights from earlier community dialogues involving active participation from relevant stakeholders.

- Protection of Women and Children is Non-Negotiable
- Every Child Has the Right to Good Health
- Community Must Unite to Report Cases of Sexual Violence
- Humanitarian Services are Free and Accessible to Everyone.

The protection team carried out a series of activities to raise awareness and strengthen community engagement on child protection. These included indoor sessions with stakeholders such as traditional rulers, religious leaders, youth leaders, and women leaders to equip them with insights into the impacts of protection activities and gather valuable feedback to improve programming.

The team also conducted door-to-door sensitization, delivering tailored messages directly to households. This personalized approach fostered trust, clarified concerns, and deepened understanding of child

protection issues like abuse prevention and available support services.

Additionally, loudspeakers were used for mass outreach, effectively disseminating key messages to wider audiences, including those in remote or underserved areas. This method ensured greater inclusivity and community-wide engagement, creating a safer and more informed environment for children. These combined efforts enhanced awareness, encouraged active participation, and strengthened collective responsibility for protecting children.

## Life skills

The GPON Protection Team in Monguno and Konduga has been actively engaging adolescents and children in structured recreational activities within schools and life skills sessions in displacement camps, reaching a total of 200 beneficiaries (50% adolescent boys and 50% adolescent girls). These initiatives are tailored to provide critical support and development opportunities for vulnerable children and adolescents affected by the crisis.

Specifically, the team has conducted life skills activities with adolescents aged 10 to 18 years, following a structured schedule. These activities have been implemented in the NRC Camp in Monguno and

the Boarding School Camp in Konduga. Participants are carefully selected based on vulnerability criteria to ensure that the most at-risk individuals within the affected population receive support.

The life skills activities aim to build resilience by equipping adolescents with essential tools to cope with the challenges of their daily lives. By fostering critical skills such as decision-making, effective communication, problem-solving, and emotional regulation, the program seeks to empower participants to navigate their circumstances more effectively and contribute positively to their communities.

## Recreational activities.

**“In 2024, a total of 2,800 children (1,460 boys and 1,340 girls) were reached through school-based recreational activities”**

The GPON team has actively engaged children in structured recreational activities across 4 schools (Lawan Massa and Konduga Central Primary Schools in Konduga, as well as Central Primary School and Charamari School in Monguno LGA). These activities are integrated into school programs to address the psychosocial concerns of children affected by conflict, providing a safe and supportive environment for emotional and social healing.

Facilitators have conducted a variety of psychosocial support (PSS) activities that allow children to express themselves freely through creative and engaging methods. These activities include drawing sessions, local and modern energizers, skipping rope exercises, puzzle games, and more. The goal of these sessions is to create opportunities for children to rebuild their emotional resilience, enhance peer connections, and foster a sense of normalcy amidst

the challenges they face due to conflict.

By incorporating these structured recreational activities into the school environment, the initiative not only promotes emotional well-being but also supports the overall development of children, helping them cope with the impacts of conflict in a positive and constructive manner.

# Case Management

GOALprime protection team, have supported 40 (10 Males, 30 females) identified children at risk in Konduga and Monguno LGAs through comprehensive individual case management activities. These cases were identified based on vulnerability assessments conducted by trained caseworkers, who thoroughly evaluated the specific needs of each child. Following these assessments, comprehensive care plans were developed to address the unique challenges faced by each child and their families.

The individualized care plans ensured tailored support, including the provision of essential food items, non-food items (NFIs), and livelihood assistance to improve the well-being and resilience of the

children and their households.

This support was designed not only to meet immediate needs but also to provide sustainable solutions that contribute to the long-term recovery and protection of the children.

By adopting a child-centered approach, caseworkers ensured that the support provided aligned with each child's best interests, addressing critical protection concerns while fostering stability and security within their communities. These interventions demonstrate the organization's commitment to safeguarding vulnerable children and supporting their path toward safety and self-reliance.

## Facilities Of Birth Certificates.

GOALPrime in consortium with SI and Intersos, through the SI\_ECHO funded project, in collaboration with the National Population Commission has successfully facilitated the registration and issuance of birth certificates for 300 children at the reception centers in Monguno and Ngala LGAs.

This initiative is a significant milestone in safeguarding the rights of children in internally displaced persons camps.

Birth registration is a fundamental human right and an essential step in ensuring that children are recognized as legal members of society. It provides them with an official identity, which is crucial for accessing essential services such as education, healthcare, and social protection. For internally displaced children, whose lives have been disrupted by conflict and

displacement, birth certificates serve as a protective measure against risks such as statelessness, child labor, trafficking, and early marriage.

By enabling access to this critical document, GOALPrime and its partners are contributing to restoring a sense of normalcy and security for these children and their families. Moreover, the initiative reinforces the importance of legal documentation in upholding the dignity and rights of vulnerable populations within humanitarian settings.

This collaborative effort also underscores the commitment to addressing the unique challenges faced by IDPs in Monguno and Ngala, ensuring that no child is left invisible or excluded from essential national systems.

# Emergency Flood Response

GOALPrime organization has responded swiftly and effectively to support victims affected by the recent flooding in Maiduguri, particularly in Gubio Camp, which hosts over 15,000 displaced individuals. The flooding caused significant disruption to the lives of the camp's residents, many of whom were already grappling with the challenges of prolonged displacement.

GOALprime's Protection Team has been instrumental in delivering essential protection services tailored to the unique needs of the displaced individuals and families within the camp. With a strong focus on structured psychosocial support for children, the team has provided safe spaces and interventions designed to help children process trauma, rebuild emotional resilience, and regain a sense of normalcy.

In addition to psychosocial support, the team has actively conducted protection monitoring to identify and address risks faced by vulnerable

individuals, including women, children, and persons with disabilities. Through regular assessments and engagement with the camp population, they have worked to mitigate risks such as gender-based violence, exploitation, and abuse.

Awareness creation has been another vital component of the intervention, with targeted sessions on the prevention of exploitation, abuse, and the importance of hygiene practices to prevent disease outbreaks in the wake of the flooding. These awareness sessions have empowered camp residents with critical knowledge to protect themselves and their families, contributing to the overall well-being and safety of the camp community.

These efforts aim to address both the immediate and long-term needs of the camp's population, recognizing that comprehensive protection services are essential for fostering stability and resilience in displacement settings.

**“Emergency flood response efforts reached 1,662 (489 boys-511 girls-582- women-80 men) individuals — providing vital support to boys, girls, women, and men in Gubio Camp, Maiduguri.”**

## Education

Access to quality education for children aged 3 to 17 remains severely constrained by a range of complex challenges across crisis-affected regions. These include poor and unsafe school infrastructure, inadequate or non-existent WASH (Water, Sanitation, and Hygiene) facilities, insecurity, targeted attacks on educational institutions, a critical shortage of qualified teachers, and the lack of inclusive premises suitable for children with disabilities. These factors have compounded the vulnerability of children and disrupted access to safe learning environments.

The impact of the crisis has been disproportionately

felt across different population subsets. Girls are at increased risk of early and forced marriage, while boys face the threat of recruitment by armed groups. Children with disabilities—who account for approximately 15% of the child population, including 8% girls—have been especially marginalized, often excluded from needs-based and inclusive educational services.

The scale of infrastructural damage is alarming. Over 56% of public primary school classrooms are considered inadequate,

and nearly 1,400 schools have been destroyed since the onset of the crisis. In addition, the severe flooding events of 2022 and 2023 affected 132 schools, depriving over 107,000 children—including approximately 9,000 children with disabilities (4,860 of whom are girls)—of access to learning facilities.

## Our Strategic Approach in 2024

In alignment with the 2024 Humanitarian Response Plan and the EiE sectoral priorities, GPON tailored its education interventions around the following strategic objectives:

- Ensure conflict-affected boys, girls, and adolescents—including children with disabilities—have access to safe, protective, quality, and inclusive education and vocational skills training in both formal and non-formal settings.
- Provide conflict-sensitive and high-quality

educational services that improve learning outcomes and promote resilience.

- Strengthen the capacity of Government Ministries, Departments, Agencies (MDAs), and communities to plan, implement, and sustain timely, appropriate, and evidence-based EiE responses.
- Implement anticipatory and readiness actions to protect and prepare children for education-related emergencies.

## Key Achievements in 2024

**Conflict Affected  
Children in 2024**

**897**

**Conflict Affected  
Girls in 2024**

**547**

**Conflict Affected  
Boys in 2024**

**350**

**GPON reached a total of 897 conflict-affected children in 2024—350 boys and 547 girls—through the continued implementation of Year Three of the ECW Multi-Year Resilience Programme (MYRP) in partnership with Street Child Nigeria.** This initiative focused on increasing access to inclusive and quality basic education, providing mental health and psychosocial support (MHPSS), and offering vocational training for crisis-affected children in safe and supportive learning environments across Northeast Nigeria.

Additionally, with funding from UNICEF SPD, GPON implemented an anticipatory action project aimed

at enhancing the resilience of conflict-affected children. This was achieved through an integrated approach combining child protection with education in emergencies programming across the BAY States.

The interventions were designed to address the diverse learning needs of children whose education had been disrupted. Activities included catch-up classes, accelerated learning programmes (ALPs), WASH support (health, hygiene, and sanitation), and the strengthening of EiEWG coordination mechanisms. These efforts provided children with pathways back into age-appropriate formal education and equipped them with foundational vocational skills.

## Institutional and Systems Strengthening

GPON also played a key role in capacity-building initiatives, supporting national NGOs and government stakeholders through training on preparedness and anticipatory action planning, contingency planning, and rapid response assessments. We further contributed to strengthening EiEWG coordination at the local government level and facilitated joint monitoring visits with government and cluster representatives to high-priority areas.

## Flood Response Intervention

As part of our emergency response to the 2023 floods in Borno State, GPON supported affected schools by distributing 300 kitted school bags, including uniforms and sandals, helping children resume learning with dignity and confidence.

## Gender base violence (GBV)

2,520

2,109

799

GOALPrime Organization Nigeria (GPON) has been actively implementing programs in the Gender-Based Violence (GBV) sector from 2022 to date, delivering critical support and services to vulnerable and affected populations in Northeast Nigeria.

**In 2024, GPON's GBV team provided immense and transformative assistance to a total of 2,520 ( 799 boys and 2,109 girls ) survivors of GBV with GBV awerens creation and case management in Konduga and Monguno Local Government Areas (LGAs).** Through comprehensive case management services, survivors have received tailored support that prioritizes their safety, well-being, and empowerment.

The team has also delivered counseling sessions to both survivors and their caregivers, offering emotional and psychosocial support to help them process trauma, regain their confidence, and begin the journey

toward healing and recovery.

As part of GPON's holistic intervention approach, survivors have been provided with essential dignity kits to address basic hygiene and personal care needs, food item support to improve their food security and overall resilience, and livelihood assistance to help them rebuild and regain control over their lives.

These initiatives have been instrumental in helping survivors regain their dignity, rebuild their confidence, and bounce back to their respective lives with renewed hope and strength. By addressing immediate needs, offering emotional support, and promoting long-term recovery, GPON continues to play a vital role in supporting GBV survivors and fostering resilience within affected communities in Northeast Nigeria.

# Community Dialogue Sessions.

**The Protection Team, as part of the consortium project in collaboration with Solidarités International under the CDCS project, successfully facilitated an extensive community dialogue session involving 80 key stakeholders across Konduga and Monguno.**

This impactful session brought together a diverse group of participants, including community leaders, women representatives, youth groups, religious leaders, and other influential stakeholders, to discuss pressing issues affecting women and children within their communities.

The discussions highlighted a range of critical challenges, such as gender-based violence, early marriage, limited access to education for children—especially girls—economic hardships, and barriers to accessing essential services like healthcare and legal support. The session served as a platform for open and inclusive dialogue, ensuring that the perspectives of all stakeholders, particularly women and vulnerable groups, were actively heard and considered.

As an outcome, participants collaboratively developed actionable recommendations to address these challenges. These included strengthening community-based protection mechanisms, enhancing awareness campaigns on women's and children's rights, advocating for improved access to education and healthcare, and initiating livelihood programs to empower women and families economically.

The dialogue ended with a strong collective commitment from all stakeholders to work together with the consortium partners to implement these recommendations effectively. The session underscored the importance of continued collaboration and community ownership in creating sustainable solutions for a safer and more inclusive environment for women and children.

# WASH

  
**Total Reached**  
**2,056,138**

- 80 latrine dislodge
- 3 motorised borehole
- 6 hand pump
- 10 blocks of communal latrine constructed
- 250 emergency sanitation facility restored

In 2024, GOALPrime Organization Nigeria (GPON) made significant strides in addressing critical WASH needs across the BAY states, particularly in high-burden areas of Borno and Adamawa. With support from NHF, UNICEF, ECHO, CDCS, and IOM, GPON reached 2,056,138 individuals with lifesaving WASH interventions.

## Key highlights include:

33,101 WASH-related NFIs distributed to 198,606 persons, including hygiene kits, cholera kits, SAM kits, and rapid diagnostic test (RDT) kits across six LGAs.

Rehabilitation of critical WASH infrastructure: 3 motorized boreholes, 6 hand pumps, and 10 blocks of communal latrines, with over 250 emergency sanitation facilities restored.

4,035 flood-affected individuals gained access to improved sanitation through targeted infrastructure repairs and distribution of WASH dignity items.

Over 21 million liters of water were chlorinated to ensure safe drinking water access for 1,447,529 vulnerable populations in camps and host communities.

82,000 IEC materials produced and disseminated to 410,000 individuals through hygiene promotion.

Capacity strengthening efforts included training 67 WASHCOM members and dislodging 80 latrine drop-holes to improve environmental health.

30 cleaning kits were delivered across GGASS Camp in Mafa and Kaga LGA to enhance facility hygiene and upkeep.

These interventions contributed to mitigating disease outbreaks, improving hygiene practices, and supporting community resilience amid floods, displacement, and chronic WASH vulnerabilities

# Water Quality Analysis and Water Chlorination

One of the targets of the Sustainable Development Goal 6 is: By 2030, achieve universal and equitable access to safe and affordable drinking water for all. GOALPrime Organisation like the UN agencies and other national and international organisations is committed and working to contribute to the achievement of this goal. To prevent the outbreak and spread of water-related diseases such as cholera, diarrhea, and typhoid which may cause adverse health challenges to beneficiaries, water quality is given due attention by GOALPrime by ensuring weekly monitoring at source and distribution points in locations of project implementation. This is made possible via the community water chlorinators who are saddled with the responsibility of monitoring the level of residual chlorines (on average 0.5mg/l

at drop-off points and 0.2mg/l at HH level) tested regularly using the pool tester. In 2024, GOALPrime chlorinated 7,374,030 liters of drinking water for beneficiaries in camps and host communities in the BAY states.

Moreso, GOALPrime carried out fifteen (15) water quality analysis as requested by the WASH sector and other WASH implementing partners for Physical, Chemical and Microbiological contamination to ascertain the portability of the water. The obtainable result was communicated to relevant stakeholders including the Sector, WASH partners community leaders and members to ensure making of relevant lifesaving decisions.

# Rehabilitation of Water Facilities Chlorination

To increase access to safe water supply, in the year 2024, GPON rehabilitated three boreholes from the GGASS Camp of Mafa LGA which were meant to serve a fraction of over 33,000 individuals in the camp but were producing suboptimal water causing long waiting queues and forcing affected population to rely on unsafe water sources. The rehabilitation work included site clearing, head work maintenance, drainage work and fencing works. These 3 boreholes had a minimum capacity of 75,000 liters of water per day (75,000 L/D) after completing the ongoing

rehabilitation and would provide 5,000 individuals with clean and safe water according to the sector standard of 15 Liter per person per day (15L/P/D). The structural rehabilitation of the boreholes took into consideration environmental safeguarding to promote ecological integrity and community wellbeing. These considerations included coordination with RUWASSA to observe regulatory compliance, use of materials and methods that withstand local climatic conditions, water management and prevention of pollution.

# 2024 INTERVENTION GAP ANALYSIS

The 2024 Intervention Gap Analysis by GOALPrime reveals a critical shortfall between our humanitarian response targets and the actual reach across five essential sectors: Education, Protection, Health, WASH, and Nutrition. Despite escalating needs, significant service delivery gaps persist—driven primarily by acute funding deficiencies.

Alarmingly, Health and Nutrition sectors received zero funding, resulting in 0% conflict affected individuals reach—an urgent red flag demanding immediate intervention to avert worsening malnutrition and preventable health crises. The Education and WASH

sectors, though partially funded, reached only 12.06% and 36.98% of their intended beneficiaries respectively, leaving thousands of conflict affected children and families without access to safe learning spaces or clean water.

Protection services crucial for safeguarding vulnerable groups, especially women and children received just 3.34% of required funding, while Education lagged behind with only 4.5% of its financial needs met. The WASH sector faces a funding gap of over \$1.19 million, further straining already fragile systems.

SECTOR/CLUSTER	FUNDING REQUIRED (\$)	FUNDING RECEIVED (\$)	FUNDING GAP (\$)	GAP %
Education	1,500,000	360,352.71	1,139,647.29	76%
Protection	1,450,000	48,410.24	1,401,589.76	97%
Health	580,900	0	580,900	100%
WASH	1,746,438	556,102.49	1,190,335.51	68%
Nutrition	254,800	0	254,800	100%

SECTOR/CLUSTER	PEOPLE TARGETED	PEOPLE REACHED
Education	13,948	3,351
Protection	31,000	15,376
Health	3,000	0
WASH	6,456,062	2,056,380
Nutrition	2,000	0

**This gap analysis is a call to action:** the humanitarian needs of the most vulnerable in Nigeria are growing, while resources are shrinking. GOALPrime urgently appeals for renewed donor commitment and strategic partnerships to close these funding gaps and deliver life-saving interventions.

We stand ready to act. With your support, we can

ensure that no child is left without clean water, no mother is turned away from health services, and no survivor is denied protection.

Now is the time to mobilize. Now is the time to respond.

A better humanity is possible, be intentional!

## Construction and Rehabilitation of Latrines

To break the potential of communicable disease outbreak due to unsanitary conditions, GPON constructed 10 blocks of improved and cleanable communal sanitation facilities with hand-washing facility at GGASS Camp of Mafa LGA and 10 blocks of latrines across target camps in Benishek in consultation with Community members and stakeholders. Disability inclusion, GBV, and other protection risk mitigations were considered during the planning, site-selection and construction phases of the sanitation facility. Based on the WASH Cluster and SPHERE Minimum Standard, each stance of latrines was accessible for 50 individuals use.

Additionally, 10 Blocks of latrines underwent rehabilitation in Mafa LGA, including reinforcing of substructure and reconstruction of damaged superstructures. Accordingly, 4,035 flood affected

individuals had access to improved sanitation facilities. The rehabilitation and construction of the sanitation facilities across project locations is a way forward to achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations.

To further enhance sanitation, GPON procured and provided latrine cleaning kits to camp and community members in the BAY states to ensure the cleanliness of the rehabilitated and newly constructed facilities. Twenty (20) sets of cleaning kits were delivered to GGASS Camp Mafa and 10 kits were delivered to Kaga LGA. Content of the kits include; plastic brooms, detergents for cleaning, buckets, jerricans, pairs of heavy-duty gloves, aprons, pairs of gumboots, masks, and laundry soaps.

## Dislodgement of latrines in Kaga, Benishek:

Given the flood-affected latrines overflowing in Kaga LGA, GPON conducted dislodgement of 80 drop holes of latrines, each approximately 3.5 cubic meters, totalling 280 cubic meters. This ensured the latrines were functional and mitigate public health risks. The dislodgment followed standard practices taken into full consideration environmental safety to allow for safe disposal of the collected faecal wastes at government approved disposal sites.

## Hygiene Promotion

One of the targets of the Sustainable Development Goal 6 is: By 2030, achieve universal and equitable access to safe and affordable drinking water for all. GOALPrime Organisation like the UN agencies and other national and international organisations is committed and working to contribute to the achievement of this goal.

To prevent the outbreak and spread of water-related diseases such as cholera, diarrhea, and typhoid which may cause adverse health challenges to beneficiaries, water quality is given due attention by GOALPrime by ensuring weekly monitoring at source and distribution points in locations of project implementation. This is made possible via the community water chlorinators who are saddled with the responsibility of monitoring the level of residual chlorines (on average 0.5mg/l at drop-off points and 0.2mg/l at HH level) tested regularly using the pool tester. In 2024, GOALPrime chlorinated 7, 374, 030 liters of drinking water for beneficiaries in camps and host communities in the BAY states.

Moreso, GOALPrime carried out fifteen (15) water quality analysis as requested by the WASH sector and other WASH implementing partners for Physical, Chemical and Microbiological contamination to ascertain the portability of the water. The obtainable result was communicated to relevant stakeholders including the Sector, WASH partners community leaders and members to ensure making of relevant lifesaving decisions.

# NFI Distribution

To complement the efforts of the Hygiene Promoters, GOALPrime distributed 16,373 NFIs to partners and beneficiaries across the BAY states including: 1,207 hygiene kits in Mafa and Kaga LGAs Borno state, 106 Cholera Kits in Kala-Balge LGA Borno state, 15,000 SAM kits as well as 60 RDT kits to WASH partners across 5 LGAs in the BAY states (Bama, Dikwa, Damaturu, Yola South, and Madagali LGAs).

Following the transportation of NFIs, GPON will distribute the kits to the registered beneficiaries in Mafa and Kaga LGAs. The distribution process will be carefully organized to ensure efficiency and orderliness, with priority given to vulnerable groups. Each kit will contain essential items for maintaining hygiene and sanitation standards, such as soap, buckets, and water purification tablets. The distribution will be accompanied by demonstrations on how to use the items effectively, promoting proper hygiene practices among beneficiaries.

## Capacity Building

### WASHCOM Training

The global trend in WASH intervention is shifting from merely rehabilitation/construction of WASH facilities and handing over the facilities to community members for use, it now incorporates Strengthening of WASH scheme and systems which include training of leaders and community based organisations eg. WASHCOM through O&M capacity building workshop. To improve WASH facilities and sustainability, GOALPrime Organization provided capacity building training for WASHCOMs (Sanitation Committee, Water Supply Management Committee and Waste Management Committee) in Camps and Host communities in Borno state. Five (5) committees (3 in Mafa and 2 in Kaga) were composed of 7 members each, whereas three (3) committees in Monguno and One (1) in Konduga LGA were composed of eight (8) members making a total of fifty-nine (59) WASHCOM members.

For sustainability, The training was followed with the handing over of water management kits including Hack saw, GI Pipes, wrench spanner set, GI elbow, PVC gum and 45 Kg 70% HTH Chlorine; Sanitation kits including wheelbarrow, heavy duty hand gloves, a shovel, protective boots, a rake, a heavy-duty site hat and heavy-duty protective cover; as well as waste management kits including waste bins, heavy duty hand gloves, face mask, broom with wooden handle and rake.

## Training of Hygiene Promoters.

Hygiene promotion is a systematic approach to working with communities to improve water and sanitation facilities, and to encourage people to adopt better hygiene practices. Some examples of hygiene practices include: Proper disposal of faeces, Washing hands with soap, Storing water properly, Using a clean latrine, Cleaning up places where mosquitoes breed, and Practicing good food hygiene.

GOALPrime recruited and trained 21 hygiene promoters disaggregated into eleven (11) females and ten (10) males across the locations of project implementation in the BAY states. The training covered topics such as:

**i** Hygiene and sanitation: Understanding the importance of hygiene and sanitation, and how to promote it.

**ii** Behavioral change: How to identify and prioritize key hygiene behaviors, and how to develop messages and an action plan to change behaviors.

**iii** Community engagement: Understanding the community, and how to work with them to promote hygiene.

**iv** Tools and resources: Using tools like drawings, flipcharts, photos, videos, and posters to promote hygiene.

Training course for hygiene promoters was designed to provide understanding for community members with limited literacy skills which also incorporated the use of pictures and demonstrations.

## WASH Common Pipeline

Common Pipeline Items Received

## Common pipeline Training

To support a more effective humanitarian response in North-East Nigeria, GOALPrime Organisation Nigeria facilitated a capacity-building training under the WASH Common Pipeline initiative.

With support from the Nigerian Humanitarian Fund's First Reserve Allocation, the training focused on strengthening partners' understanding of pipeline procedures and improving access to essential WASH resources, including IEC materials and WASH SAM Kits across five Local Government Areas.

This initiative played a vital role in enhancing coordination, harmonizing supply distribution, and ensuring efficient resource management in both emergency and early recovery contexts.

By equipping WASH partners with practical knowledge and tools, the training directly contributed to the improved delivery and sustainability of WASH services in the region.

The Objectives of the training were to:

- provide a detailed understanding of the WASH Common Pipeline, including its objectives, structure, and operational mechanisms.
- train participants on the entire pipeline process, from needs assessment to post-distribution monitoring (PDM).
- enhance participants' knowledge of key tools and documents, including the Common Pipeline Request (CPR) form, Distribution Report template, and Flow Chart for accessing the pipeline.
- improve coordination among partners, ensuring effective communication and collaboration within the WASH sector and with other clusters, such as logistics.
- reinforce the importance of accountability, data accuracy, and compliance with reporting requirements.
- Beneficiaries of the training included:
  - WASH sector partners, including NGOs, INGOs, UN, and government representatives.
  - Field staff involved in the distribution of WASH NFIs.
  - Other relevant stakeholders.

In general, 30 participants were trained across the BAY (Borno, Adamawa, and Yobe) states, including technical leads, program officers, and field staff.

## RRM

This response focuses on any unforeseen natural disasters, displacements or epidemics and IS implemented jointly with the Rapid Response Mechanism (RRM). The aim is to provide immediate assistance to the affected populations or basic survival before the conventional WASH response. The response is closely coordinated through the RRM working group.

These specific emergency response includes

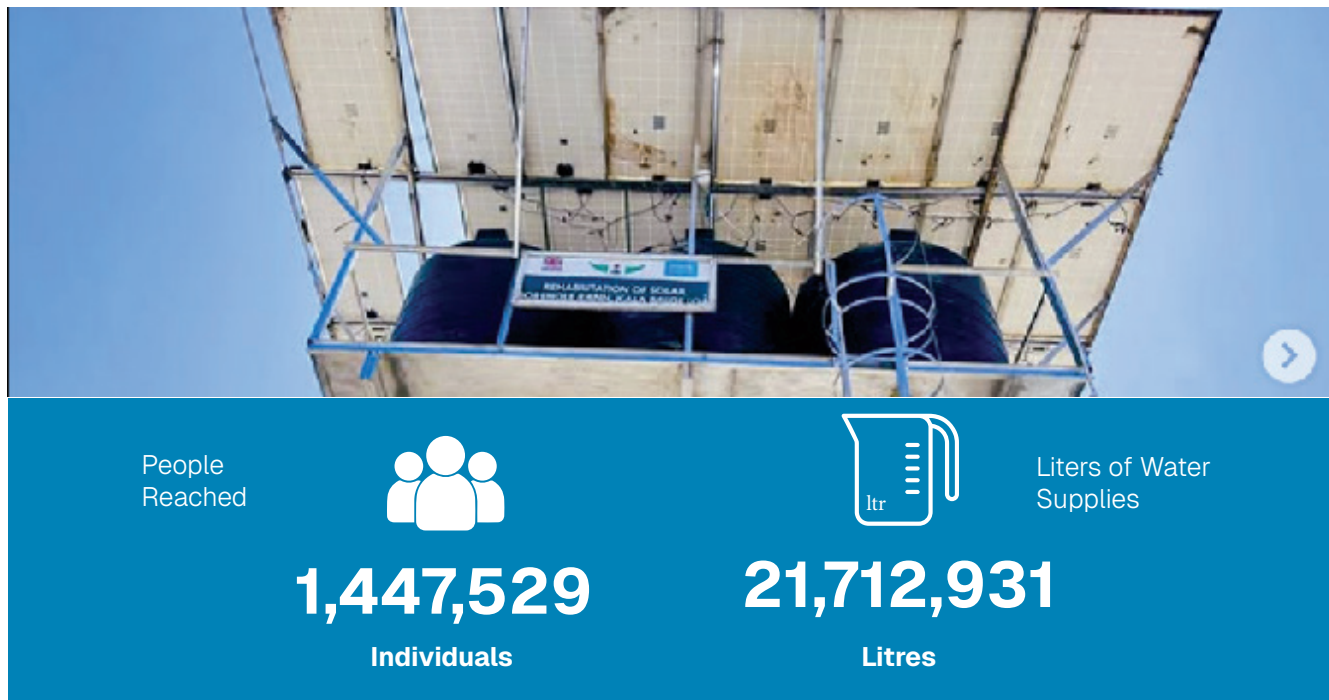

emergency water trucking, which is only limited to a period of no more than three months, while looking for other more sustainable water supply options.

Response to outbreaks including disinfections, water point treatment, distribution of kits, awareness raising and coordination, provision of communal latrines and rehabilitation/dislodgement of existing ones and distribution of essential NFI hygiene kits.

In 2024, GOALPrime partnered with UNICEF to provide WASH services to flood affected population in Rann (Kala-Balge LGA) Borno state

## Water Supply:

This include the Rehabilitation of 3 motorized boreholes and 6 hand pumps that were damaged during the flood, ensuring access to safe drinking water for over 7,000 individuals residing in the IDP camps. Also, via Water Chlorination at key water points to prevent the spread of cholera and other waterborne diseases by regularly monitoring of Free Residual Chlorine to ensure safety, approximately 75, 000 liters of chlorinated water was provided per day for beneficiaries.

## Sanitation and Hygiene Improvement

GPON also provided essential WASH dignity kits and cholera kits, including soap, jerrycans, and water purification tablets, to 106 households, prioritizing those with children under five, pregnant women, and other vulnerable groups.

## Distribution of WASH NFIs

250 damaged emergency sanitation facilities were rehabilitated to address sanitation problems and to as well curb the menace and risk associated with open defecation.

GOALPrime supported the production of Information Education Communication (IEC) materials and jingles for risk communication where partners and government agencies received through the common pipelines for advocacy and promotion in camps and communities which helped to generate and sustain momentum. The IEC Materials and jingles were produced in different forms including posters, stickers, one pagers, and flipcharts. The IEC materials were also translated into different local languages including Hausa, Kanuuri, Fulfulde, shuwa arab and English to enable transfer of knowledge and information to beneficiaries in peculiar languages for effective comprehension of message.

A total of 82,000 IEC materials were distributed across the BAY states as illustrated in the table below:

S/N	Description	Size	Unit/ Packaging	Total
1	Flip chart	A3x24	Pieces	1250
2	Posters/Singles	A3	Pieces	35250
3	Stickers	A5	Pieces	10250
4	Flyer/hand bills	A4	Pieces	35250
Total Available				82000

## Communication for Development (C4D)

Effective media and communication remain central to GOALPrime Organization Nigeria's humanitarian response strategy. In 2024, the Communication for Development (C4D) unit played a pivotal role in bridging information gaps, promoting lifesaving messages, and supporting program visibility across various sectors.

## Key Achievements:

### Strategic Sector Collaboration:

The C4D unit collaborated closely with the Health, Nutrition, Education in Emergencies, and WASH in Emergency sectors to roll out impactful communication initiatives. These partnerships enhanced community awareness and engagement on key humanitarian issues.

### BABY WASH Campaign Success:

A notable milestone was the creation and distribution of 10,000 specialized BABY WASH IEC materials, promoting child water safety under the theme “Child Water Safety Chain” and encouraging proper hygiene practices through the message “Wash Your Hands, Save Your Child.”

### Increased Event Visibility and Public Engagement:

C4D contributed to the successful commemoration of major WASH sector events through tailored media content and illustrations, significantly increasing public reach and awareness:

- [World Water Day](#)
- [Global Handwashing Day](#)
- [World Toilet Day](#)
- Menstrual Hygiene Day 2024
- [Baby WASH](#)

### IEC Material Production:

Over 82,000 Information, Education, and Communication (IEC) materials were developed and distributed across intervention communities. These materials were designed to inform, educate, and empower beneficiaries on crucial health, hygiene, and safety practices.

### Enhanced Sector Reporting Through Design:

The C4D unit led the design and illustration of key sector reports, significantly improving their readability and stakeholder appeal:

- Designed visibility materials for WASH Sector's Rapid Response Mechanism (RRM) reports in Mafa, MMC, Jere, and Rann (Kala-Balge) LGAs.
- Published the final WASH Sector Flood Assessment Report with engaging visuals.
- Delivered layout and visibility design for the Multisectoral Needs Assessments in Baga and Kukawa LGAs.
- Developed comprehensive visual elements for the WASH Localization Strategy, aiding sector-wide adoption and understanding.

Through these efforts, the C4D unit not only amplified the voices of affected communities but also ensured that life-saving messages reached the right audiences, at the right time, and through the right channels.

# HUMAN INTEREST STORIES

---

## EMPOWERING AISHA THROUGH THE ALTERNATIVE EDUCATION PROGRAM IN MAFA LGA

Aisha, a 14-year-old girl from Mafa LGA, was one of the many marginalized children who faced significant barriers to accessing formal education. Her family, struggling with financial hardships and cultural constraints, could not afford to send her to school. As a result, Aisha spent her days helping with household chores and had little hope of receiving a formal education. In January 2024, Aisha's life took a positive turn when she was enrolled in the ECW MYRP YR3 program by GPON program team. The program, designed to provide quality and inclusive basic education to vulnerable children, offered her a second chance of learning.

At first, Aisha found it difficult to adjust to a structured learning environment. She struggled with basic literacy and numeracy skills and was hesitant to participate in class activities. The community volunteer teachers played a crucial role in encouraging Aisha. They provided her with individual attention and support, helping her build confidence in her abilities.

Aisha's journey from a marginalized girl with no access to education to a confident and aspiring learner exemplifies the transformative power of the ECW MYRP YR3 Program. Her story is proof to the impact of providing inclusive and supportive educational opportunities to vulnerable children. Through the dedication of community volunteer teachers and the structured AEP, Aisha has been empowered to overcome educational barriers and is now on a path to a brighter future.

Aisha

# SUCCESS STORY OF GAMBOYA ADAMU FROM MAFA COMMUNITY

---

## Gamboya

Gamboya Adamu 9 years old physically challenged who was displaced due to the insurgency in Northeast Nigeria, lost all hope of ever having a great future coupled with her condition as a physically challenged girl child found herself in MAFA LGA with her mother who looks after her and other kids.

Gamboya was neglected by her peers and due to her challenge couldn't attend school. She lives in Mafa LGA with her single mother along with other children, into a community grappling with poverty, displacement, and limited access to education due to the ongoing conflict, Gamboya's future seemed uncertain. However, her life took a transformative turn when she was enrolled in the ECW MYRP alternative education program, specifically designed to provide quality education and support to marginalized children like Gamboya who had been affected by the conflict in the region. The program aimed to empower young individuals with knowledge, skills, and opportunities for personal growth and development.

Gamboya was profiled and enrolled in the program with other out of school Children, she had never attended a formal school before. She faced numerous challenges, including a lack of confidence, trauma from the conflict, and cultural barriers that limited educational opportunities. However, the ECW MYRP program was a safe and inclusive environment that would enable her to flourish. Academically, the program ensured that Gamboya received a well-rounded education. volunteer teachers utilized innovative teaching methods and adapted the AENN curriculum, using the warmup songs farin Daraci, Aikatarwa and Aiwatarwa following all the steps from the manual to meet the specific needs of marginalized students like Gamboya.

her peers and due to her challenge lives in Mafa LGA with her single mother along with other children, into a community grappling with poverty, displacement, and limited access to education due to the ongoing conflict, Gamboya's future seemed uncertain. Over the course of the program, Gamboya's progress was truly remarkable. She excelled academically, consistently achieving high grades in her assignments and class work, Gamboya's confidence soared, and she found her voice, becoming an inspiration for her peers and younger girls in the community irrespective of her condition.

# Success Story

## Transforming Falmata's Life Through Support and Empowerment

### Falmata

This is the story of Falmata, a 5-year-old girl living in a boarding school camp in Konduga. Her early childhood was marked by hardship and neglect due to the financial struggles faced by her caregiver. Driven by the need to find sustainable means of survival, the caregiver spent long hours away, leaving little time to provide Falmata with adequate care and supervision. As a result, Falmata was often left unkempt, hungry, and isolated, displaying signs of emotional distress such as avoiding interactions with others. Her lack of proper care left her vulnerable, particularly when her caregiver was absent.

Despite these challenges, there was a deep bond between Falmata and her caregiver, who genuinely wanted to care for her but was overwhelmed by the realities of poverty. Recognizing the dire situation, GPON caseworkers stepped in to provide assistance. Falmata's case was registered for case management,

which became a turning point for her and her caregiver.

The caregiver participated in Childcare sessions with GPON caseworker (Positive Well-being Visits), designed to promote positive parenting practices and build resilience. These sessions empowered the caregiver with practical skills and strategies to improve their caregiving approach, ensuring that Falmata's emotional and psychosocial needs were met. Over time, the caregiver's newfound confidence and understanding significantly enhanced Falmata's well-being, creating a more nurturing and stable environment for her to thrive.

To further support the family, GPON provided additional assistance, including a non-food item package, one-time food assistance, and livelihood support to establish a small-scale business. These interventions not only alleviated immediate financial pressures but also paved the way for the caregiver to build a sustainable livelihood. With this support, the caregiver was able to ensure that Falmata was properly cared for, even during her

absence. She arranged for neighbors to supervise Falmata when necessary, reducing the risks associated with neglect and ensuring the child's safety.

Today, Falmata is a healthier, happier child, showing signs of emotional stability and confidence. Her caregiver is now better equipped to meet her needs, and their relationship has grown stronger.

# 2025 ongoing Initiatives and Social Enterprise

GOALPrime Organization Nigeria (GPON) will implement a social enterprise model that integrates entrepreneurship, technology, investment, and innovation to drive financial sustainability while funding education, governance, humanitarian response, agriculture, and enterprise development.

This strategy will position GPON as a leader in sustainable social impact, with initiatives that generate revenue while transforming communities across Africa.
